Nine new libraries were added during 1926.

Four were added to the list of Free Public Libraries: Bridgeburg, Meaford, Niagara Falls Branch, and Toronto, Gerrard Branch.

Seven Association libraries were added during the year. These are: Apple Hill, Blind River, Cobalt, Cottam, Harrowsmith, Middleville and Wellington.

Bridgeburg and Meaford were formerly Association Public Libraries, and have been transferred to the list of Free Public Libraries.

Apple Hill, Harrowsmith and Wellington were formerly closed Association Public Libraries.

## ASSOCIATION PUBLIC LIBRARIES

Showing Statistics, 1925, and Legislative Grants Paid in 1926

## APPENDIX T

**REPORT OF THE PRINCIPAL OF THE ONTARIO  
TRAINING COLLEGE FOR TECHNICAL  
TEACHERS FOR 1926**

The work of the Training College has been carried for the year 1926 along the lines set forth in the 1925 report. No important changes have been made in the courses of study or the arrangements for practice teaching.

**Qualifications for Admission**

Experience has shown that it may become necessary to make a more careful determination of the qualifications of the applicants for admission. The general education of the applicant has been determined by an entrance examination in English and in mathematics. A candidate who could submit evidence of having taken two years of High School work has been exempted from this examination.

Applicants are required to have had satisfactory training and experience in the trade concerned. The statements of the applicant in regard to his training and experience in the trade have been accepted at more or less face value. It has been found that mere statements of the length of time the applicant has worked at the trade do not furnish a sufficient guarantee of his skill and attainments. Efforts to confirm such statements by correspondence with employers, and by examination of testimonials and credentials have not helped very much in determining the validity of the applicant's claims.

As it is most important that teachers of practical subjects in technical schools should be skilled workers, thoroughly proficient in the trade concerned and acquainted with its recent developments, it is necessary that only such persons as have these qualifications should be admitted to the Training College. The method of determining these qualifications heretofore used has not been entirely satisfactory. In future an applicant for admission will be required to show his attainments as a skilled worker in the trade concerned by passing an examination in the fundamental principles, operations, processes and skills of the trade. The examination will be oral and written and will include a performance test.

**Domestic Arts Teachers**

The problem of furnishing an adequate supply of domestic arts teachers, *i.e.*, teachers of millinery and of dressmaking, has not been satisfactorily solved. Teachers recruited from the trades have not in some cases the general education desirable in a teacher, and in other cases the skill and broad trade training which their years of experience would seem to indicate. On the other hand, teachers recruited from the teaching profession, more particularly from among the domestic science teachers, who take short intensive courses in domestic arts, have not the speed and all-round skill which the trade demands and which the teacher in a technical school should have if she is to hold the respect of her students and of her fellow-workers in the trade. It was expected that domestic science teachers who took the special summer courses in millinery or in dressmaking would obtain a certain amount of trade experience and so qualify for a

certificate to teach these subjects. It appears, however, that they take these special courses primarily as improvement courses for domestic science teaching.

It is proposed as a possible solution of the problem to offer a one year's course in practical work in domestic arts similar to that now given in domestic science in the College of Education. The course would be open to certificated teachers holding at least a Second Class Certificate.

In some of the smaller technical schools the need for a millinery or a dress-making teacher is not sufficiently great to justify the employment of a full-time teacher. Teachers legally qualified to teach academic work who hold also a certificate in domestic art would find ready employment in the smaller schools.

#### **Extension Teacher-training Classes**

As pointed out in the 1925 report, the Training College carries on not only classes for the training of day school teachers, but carries on also extension teacher-training classes for the instruction of evening class teachers. The majority of such teachers are employed in the day time and cannot be expected to give up their regular employment to take a course at the Training College. For their benefit, short, intensive courses in the methods of teaching are conducted by the staff of the Training College at convenient centres.

Extension classes were conducted in London and Guelph during the months of January, February and March, and in Kitchener during October, November and December, 1926. Evening class teachers from St. Thomas attended the London class.

While the courses were planned and conducted for the benefit of evening class teachers without any professional training in the methods of teaching, a number of certificated teachers in the vocational schools availed themselves of the opportunity to take a refresher course.

In London, sixteen teachers without professional training formed the nucleus of the class. The lowest attendance was twenty-one; the highest, thirty-one; and the average, twenty-five. In Guelph, there were twenty persons without professional training. The lowest attendance was sixteen, the highest, thirty; and the average, twenty-one. In Kitchener, the attendance was remarkably good, averaging twelve out of a possible thirteen.

One evening each week the whole group met together for instruction in the mechanics of teaching, under such topics as kinds of lesson, steps in presentation, questioning, use of blackboard, class organization, making of lesson plans, trade analysis and methods of organizing a course of study. Practice teaching was done by the teachers-in-training, and written criticisms made by members of the class. On other evenings the members of the Training College staff met with the teachers in their classes to give advice and help. On convenient occasions during the day-time, they met with individual teachers to discuss lesson plans, organization of subject matter.

In London, where certain members of the staff have been assigned to the work of vocational guidance, several periods were given to a discussion with these teachers of the principles and methods of vocational guidance.

#### **Manual Training Courses**

Summer courses for the Elementary Certificate in Manual Training have been carried on for some time as an independent activity. These courses have been placed under the management and control of the Training College.

For some years no provision was made for a course leading to the Ordinary Certificate in Manual Training. In the summer of 1925, arrangements were

made for offering such a course in the Training College. The arrangements provide for a course of one year in practical shop work and practice teaching in manual training. The course is open to (a) holders of Second Class Professional Certificates who can give some evidence of skill in the use of the common woodworking tools; and (b) skilled mechanics. The first session of the course opened in September, 1925, with a class of four students with Second Class certificates. The class beginning in September, 1926, has an enrolment of six.

In 1926 the requirements for a Specialist Certificate in Manual Training were changed. Under the new provisions, teachers holding Permanent Ordinary Manual Training Certificates may obtain Specialist standing by two summer courses at the Ontario Training College. Each summer course is of five weeks duration, of eight hours a day, totalling 400 clock hours of practical shop work. The courses cover advanced work in wood-finishing, applied design, woodturning, cabinet-making and art metal work. The first session was given in the summer of 1926 with an enrolment of twenty-three.

#### Enrolment

The enrolment in the Training College courses for 1926 was as follows:

##### RESIDENT COURSES

|                     | Men | Women | Total |
|---------------------|-----|-------|-------|

F. P. GAVIN,  
Principal.

Hamilton, February 15th, 1927.

## APPENDIX U

## ONTARIO SCHOOL FOR THE BLIND

## ANNUAL REPORT OF THE SUPERINTENDENT

## Attendance

The average attendance for the session which ended June, 1926, was 138. School opened in September, 1925, with 135 in attendance. Before the end of the school term in June, 1926, seven new pupils entered, making a total attendance of 142, of whom eighty-five were boys and fifty-seven girls. The number of pupils registered for the twelve months of the official year, from October 31st, 1925, to the same date in 1926 was 154, just three less than in the preceding year. The total registration at the opening of the school in September, 1926, was 120.

At the opening of the school in September, 1926, twenty-seven pupils had not returned, of whom twenty-three were boys and four girls. Of these, ten graduated; five had too much sight and returned to public school; three were physically unfit; two remained home to work; two remained out on account of temporary ill health, and five did not return from the west on account of the indifference of their parents.

## Staff

The only change in the staff during the present year was owing to the death of Miss Cooper, who had filled the position of Household Science Teacher for a period of nineteen years. Her death at the school in May, after a very brief illness, was deeply regretted, as her years of faithful unselfish service had endeared her to the pupils and teachers. The position has been filled by the appointment of Miss Jean Clark, of Ottawa, a graduate of the MacDonald Institute at Guelph, and of the Normal School, Ottawa.

## Concerts

One of the features of the concerts held during the year that has attracted much attention was the ease and grace with which the pupils took part in plays. The seniors presented a comedy translated from the German, and if there was any doubt in the minds of the visitors about the blind taking their places on the stage and playing well the parts allotted to them it was dispelled by the successful presentation of this comedy. The work of the boys in gymnastics was a variation in the programme which showed something of the variety of training received by our pupils.

## Gymnasium

It is a pleasure to be able to report a marked improvement in the boys and girls as a result of their physical training in the gymnasium. The Physical Director has given for the past few years a well defined course of instruction to the boys which has had such beneficial results that the girls of the school have also been placed under his charge. The necessary gymnasium outfits have been provided and the girls are entering into the competitive exercises of their new course with considerable interest and enthusiasm.

### **Improvements in Main Building**

Battleship linoleum was laid in all the main corridors during the summer vacation with a resulting improvement in appearance and a considerable deadening in the sounds which were so clearly heard owing to the wooden floors.

The girls' washroom and lavatories were completely overhauled and provision made also for teachers and maids on the second floor. Many of the sitting rooms, class rooms and hall-ways were decorated to conform with the work begun in the previous year, and the completed work is very attractive. Suitable furniture was added to the boys' and girls' club rooms and additional facilities provided for games of different kinds.

### **Pipe Organ**

The organ, which has given good service for a number of years, has been overhauled and put in excellent condition. It was decided that the pitch should be changed from concert to international, so that it may be at all times in tune with our pianos. The work was done according to specifications submitted by Dr. Ham and the completed work is to be inspected and approved by him.

### **Distinguished Visitors**

A résumé of the newspapers every morning keeps our pupils in close touch with public affairs, and they gave, during the term, an enthusiastic welcome to an interesting and interested visitor in the person of Rt. Hon. Arthur Meighen, late Premier of Canada. Mr. Meighen visited every department of the school and evinced deep interest in all that he saw. His brief address to the pupils was closely followed and keenly appreciated. They were equally elated a few weeks later when the school was honoured by a visit from the present Premier of Ontario, under whose Department of Education the school is administered. His personal interest in their work and welfare and his sympathetic address in the Assembly Hall pleased them more than a little. The Hon. J. S. Martin, of Port Dover, Minister of Agriculture, spent an intimate and friendly evening with the senior choral class, entering with interest and zest into their musical efforts, listening to and contributing to their impromptu programme.

### **Social Evening**

Several very enjoyable social evenings were spent during the past year by the boys and the girls, each inviting and entertaining in their turn, guests from the city. These evenings were spent in games, cards and dancing, the school orchestra supplying the music. One cannot over-estimate the value to these young people of opportunities such as this, for their education should include the privilege of social contact with others, and the refining influences which such contact may bring.

The students are grateful to many organizations in the city for the opportunity of attending concerts of different kinds, for the numerous oratorios and musical entertainments they are permitted to attend.

### **Pictures**

The school is indebted to the Imperial Order of the Daughters of the Empire in co-operation with the Department of Education, for a series of beautiful framed pictures, seventeen in number. These pictures adorn the walls of the corridors and main sitting rooms and add much to their attractiveness.

### Convention in Nashville

The twenty-eighth Biennial Convention of the American Association of Instructors of the Blind was held this year in Nashville, Tennessee, from Monday evening, June 21st to June 25th.

The delegates present represented residential schools for the blind in the United States and Canada, the public school classes, and libraries maintaining departments for the blind. In addition, Japan and Spain were represented by visitors.

The subjects discussed at this convention covered a wide range, dealing the first day with "Vocational Direction," "Summer Schools in connection with our Regular Schools for the Blind," and "Training Pupils in Habits of Industry." Much attention was given to the subject of Music, the papers being "Incentives to better accomplishments in Music among the Blind," and "How can the vocational value of Music be increased?" A demonstration clinic in Binet tests was conducted by Dr. Hayes of Mount Holyoke College, illustrating the methods to be followed by teachers in their classes. Interesting talks were given on games suitable for the blind and the development of play initiative. Methods of developing the imagination of blind children were presented with much interesting discussion, and the question of whether blind pupils should be encouraged to go to college was the theme of one most interesting paper. Side-lights were given on English schools for the blind and upon the education of the blind in Japan.

A survey was given by Edward E. Allen, of the Perkins Institute, of the work for the blind in the United States from its beginning until now.

The afternoon of Thursday was devoted to an excursion to the Hermitage, home of President Andrew Johnson, and to other points of interest in and about Nashville. In the evening two papers which attracted much interest were "The Ideal Superintendent of a School for the Blind from the standpoint of Teachers and Pupils," and "The Ideal Teacher from the standpoint of the Superintendent."

Little idea can be gained from such a brief account of the convention proceedings, but the papers and discussions which followed were all worth while. The proceedings have been printed and distributed to the different schools for reference, and teachers interested in the education of the blind will find embodied in them a very useful contribution to the literature of this particular field of special education.

### Scholarships

Certain pupils in the school have shown remarkable talent for music, and Dr. Ham, who is the inspector of musical instruction, has felt strongly that the generous work of the Government should be supplemented by the establishment of scholarships to benefit specially gifted students and to give them the opportunity of studying with some of our eminent Canadian teachers, and with this object in view he has used his influence in securing scholarships at the Toronto Conservatory of Music.

One of these pupils, named Stanley Macbeth, of Toronto, has attracted a great deal of attention, and interviewers from Toronto newspapers and elsewhere have paid tribute to his genius. He has an instinctive musical gift of a most extraordinary nature, and while he does not know the first thing about the basic principles of harmony, form, or structure, he instinctively obeys all of these laws. He is an undoubted genius whose most remarkable gift is in his power of improvisation. Stanley Macbeth leaves after the Christmas vacation

to take up violin study with Dr. Luigi Von Kunits at the Conservatory of Music.

The other of the scholarships has been presented by St. Dunstan's Chapter, I.O.D.E. of Toronto, and has been awarded to Miss Kathryn Sells, of London, who will go to Toronto for one year to continue her study of the piano at the Conservatory.

#### Field Day Sports

The annual Field Day Sports were held in May and as usual attracted an interested group of spectators. The zest with which the blind boys and girls entered upon the various contests requiring strength and speed is quite remarkable, and the results compare most favourably with similar competitive contests in schools for the seeing. When the pupils have been shut in for the greater part of the school year in a gymnasium with apparatus work and drills, it is a rare treat for them to get out in the open in the athletic field and to participate in the different events. The running races are made possible by means of parallel wires along which run rings attached to ropes held in the runners' hands. The pupils can thus run confidently without fear of getting off the track.

Brantford, December, 1926.

W. B. RACE,  
*Superintendent.*

#### PHYSICIAN'S REPORT

I beg to forward my report for the year ending October 31st, 1926, as physician to the School for the Blind.

The year in our hospital was rather a strenuous one, and involved taking care of more serious cases than usual.

I regret to report the death of Miss Cooper, a much loved and highly respected officer of some years standing. She passed on May 29th, 1926.

The list of cases is as follows:

|                           |          |
|---------------------------|----------|
| Pneumonia.....            | 8 cases  |
| Appendectomy.....         | 1 case   |
| Erysipelas.....           | 1 case   |
| Mastoid.....              | 1 case   |
| Middle ear infection..... | 9 cases  |
| Influenza.....            | 94 cases |

I am glad to report that the year was free from other contagious diseases. The hospital has been efficiently supervised by Miss Wright, R.N.

Respectfully submitted,  
J. A. MARQUIS.

Brantford, December, 1926.

#### DENTIST'S REPORT

I have the honour to submit the following report for the year ending October 31st, 1926:

During the term an examination has been made of all the pupils. Eighteen boys and sixteen girls required no attention. One hundred and twenty-five

fillings were inserted for the boys and seventy-five for the girls. Fifty teeth were extracted—mostly deciduous ones.

During the eight years I have had charge of the dental work of the school every operation that I wished to do has been completed with no trouble. Needless to say this has given me great satisfaction, and I fully realize it could not have been accomplished but for the fine spirit among the pupils and the sympathetic co-operation of those in charge.

Respectfully submitted,  
J. R. WILL.

Brantford, December 18th, 1926.

OCULIST'S REPORT

I have the honour to report the results of the examination of the pupils' eyes for the year 1926:

| Condition of Sight                                    |      |        |       |
|-------------------------------------------------------|------|--------|-------|
|                                                       | Male | Female | Total |
| 1. Without perception of sight in either eye.....     | 1    | 1      | 2     |
| 2. Perception of light in one, none in the other..... | ..   | 1      | 1     |
| 3. Perception of light in both eyes.....              | 1    | ..     | 1     |
| 4. Limited objective vision in one eye.....           | ..   | 2      | 2     |
| 5. Limited objective vision in both eyes.....         | 3    | 3      | 6     |
|                                                       | 5    | 7      | 12    |

This table refers to the sight of the new pupils just entering the school and examined for the first time. With the exception of one, the sight of all is very bad; two are in total darkness, and two others can only distinguish light from darkness, while the rest have sight enough to go about freely. The one exception referred to has sight enough that, with some difficulty, he might continue to get his education at public school, but because of the nature of the disease in his eyes it would be highly inadvisable.

The degree of sight possessed by a pupil is not the only consideration when passing on the eligibility of a pupil for admission to the school, but as far as possible we must look into the future, and if we find a child with sight already considerably reduced from a disease which observation and statistics teach us is likely to progress to approximately total blindness, we consider that child should have the advantages of the special methods of teaching followed at the school as early in life as possible.

On the other hand, it is sometimes necessary to point out to parents the inadvisability of placing their child in a School for the Blind even though his sight may be sufficiently reduced to make it difficult for him to obtain his education at a public school. It is obvious that all entering the School for the Blind must be taught by the same methods; and a graduate is looked upon as a blind person, and it probably handicaps him later in life in obtaining employment, in competition with a person with equally poor sight but not regarded as a blind person.

And this makes it evident why all sufficiently large centres of population should have so-called sight-saving classes where some special facilities and special attention may be given these children who can see the black-board with difficulty even from the front seats in the ordinary public schools.

To return to the consideration of the pupil with more sight than the rest of this class. He has a congenital condition, found also in other members of the family, which is almost sure, in a few years, to produce total blindness, and

medical science, as yet, cannot check it. One other pupil with a similar condition in the eyes who was examined twice in less than a year illustrated what we may expect in the above case. This child on first examination could count fingers with the right eye at a distance of twenty feet, left eye three feet. On second examination in less than a year this was reduced to right eye, seven feet; left eye, the ability to distinguish light from darkness.

Hence, knowledge, experience, and good judgment are necessary in passing on the eligibility of a pupil to the School.

#### Diseases Causing Blindness

|                            | Male    | Female  | Total    |
|----------------------------|---------|---------|----------|
| Congenital cataract.....   | 1       | 3       | 4        |
| Optic Atrophy.....         | 2       | 1       | 3        |
| Retinitis Pigmentosa.....  | 2       | ..      | 2        |
| Ophthalmia Neonatorum..... | ..      | 1       | 1        |
| Myopia.....                | ..      | 1       | 1        |
| Undetermined.....          | ..      | 1       | 1        |
|                            | <hr/> 5 | <hr/> 7 | <hr/> 12 |

Congenital cataract is the cause of blindness in one-third of this year's class. Some of these cataracts have been operated on in an effort to improve sight but proved of no benefit, while the rest show that operation would be hopeless because, as is so often found in these cases, the cataract is only a part of the trouble, the real cause of blindness being deeper in the eye behind the cataract and not amenable to treatment.

The cause of the blindness in two of the pupils, while not classed as such, is probably primarily due to congenital syphilis.

We are pleased to find only one blind from Ophthalmia Neonatorum.

The one referred to as undetermined is actually blind because of a peculiar opacity of the corneal, giving the appearance of "ground glass," and opaque lenses, from the history probably not congenital. Also from the fact that the eyes are totally blind there must be disease of the deeper parts which cannot be seen. And yet from the history and the present appearance it is not possible to say what disease was the original cause.

A good clinical history accompanying the application form is of great value when sending these children to the school, as it enables more intelligent watching of the eyes while here, as well as making more accurate diagnosis of conditions possible.

It is remarkable that this year there are no "accident" cases. This term covers loss of sight from penetrating wounds of the eye, injuries to the head, firearms, fire-works, explosions, and all the multiplicity of occurrences contributing so much to blindness that might be prevented by the exercise of reasonable care. In fact, all but the one blind from Ophthalmia Neonatorum and the two probably originating from congenital syphilis are due to diseases over which with our present knowledge there seems to be but little control.

A number of the pupils who had been examined on previous occasions were re-examined and their present condition compared with that previously recorded. The usual variations were found, but none remarkable. Some suggestions were made for their improvement in accordance with their increasing years and experience.

A few acute conditions of the eyes required attention during the term, but none of a very prolonged or serious nature.

Respectfully submitted,

Brantford, Ont., November 30th, 1926.

B. C. BELL.

## REPORT ON MUSICAL INSTRUCTION

I have the honour to submit herewith my report on the musical work accomplished by the students of the Ontario School for the Blind, Brantford, for the academic year 1925-1926.

The examinations in practical knowledge were conducted on June 7th and 8th, and the theoretical work on June 9th.

The practical subjects included are as follows: Piano, Organ, Violin, Singing, Piano and Harmonium tuning.

The theoretical examination included Elementary and Primary Rudiments, Junior Harmony, Counterpoint and History and Intermediate Counterpoint.

Piano.—The piano playing, especially in the earlier grades was very good, and full of promise. In a few cases, however, the touch and technique were not entirely satisfactory. I suggest that more attention should be given to these important points. The Musical Director, Mr. Lord, Miss Smyth and Miss Howell are to be complimented on the general efficiency of this part of the work.

The results of the various classes are:—

Introductory—Four passed with 1st Class Honours; two with 2nd Class Honours; two passed.

Elementary Class—One gained 1st Class Honours; and three Second Class Honours.

In the higher Primary Division three gained 2nd Class Honours; three passed; one failed.

In the lower Primary, one received 2nd Class Honours; and four passed.

Junior (Higher)—One gained 1st Class Honours and two passed.

Junior (Lower)—Two passed and one failed.

Intermediate Class.—One gained 1st Class Honours; one passed, two failed.

Three advanced students in the Progressive Stage performed most satisfactorily. Their rendering of several classical works displayed considerable interpretive power.

Violin—There is a decided forward movement in the violin playing as compared with previous years. The bowing, tone and technique were good. Mrs. Lord is responsible for this class, and her work as a teacher is excellent.

The results were as follows:—

Elementary "School" Examination—One passed.

Junior "School" Examination—One gained honours, and one passed.

In Organ-playing the one candidate played with authority and distinction; with systematic study he should become a first rate performer.

The School Choral Class under the direction of the able Musical Director, Mr. Lord, performed several numbers with good effect. The shading, tone quality and enunciation of the senior class was especially good in Part Songs by Elgar and Boughton. The Juniors sang their well chosen little two Part Songs with sweetness and with evident enjoyment.

At the Morning Prayer Service, conducted by the Principal, Mr. Race, the singing of the National Anthem and the Hymn was most effective.

Piano and Harmonium Tuning—This department continues to flourish under the tuition of Mr. Ansell. Some of the students are not only first class tuners, but are able to do minor repairs in a business-like efficient manner.

All the pianos of the school used for lessons and practice are tuned, regulated and repaired by this department.

The following are the results in the Theory of Music:—

Elementary—Four with 1st Class Honours and three with 2nd Class Honours.

Primary—Two with 1st Class Honours, one with 2nd Class Honours, three passed, one failed.

Junior—One with 1st Class Honours, five with 2nd Class Honours, six passed, two failed.

Intermediate Counterpoint—Two with 2nd Class Honours, one passed, one failed.

A carefully graded course of study in Musical History and "Musical Form" would be of great advantage to the pupils in the more advanced classes.

In conclusion I would like to offer my hearty congratulations to the Principal and to all the Music Staff on the really excellent work done during the past and academic year.

Respectfully submitted,

(Sgd.) ALBERT HAM,  
*Mus. Doc., F.R.C.O.*

#### LITERARY EXAMINER'S REPORT

I inspected the literary work of the Ontario School for the Blind on June 3rd, 9th and 10th, and beg to report as follows:—

The staff is as follows:—

|                    |                           |
|--------------------|---------------------------|
| Mr. Cole.....      | Fifth and Fourth classes. |
| Miss Burns.....    | Fifth and Fourth classes. |
| Mr. Langan.....    | Senior and Junior Third.  |
| Miss Moffit.....   | Junior Third and Second.  |
| Miss Maguire.....  | Junior Second and First.  |
| Miss Draper.....   | First and Primary.        |
| Miss Paterson..... | Kindergarten-Primary.     |
| Mr. Donkin.....    | Manual Training.          |
| Mrs. Strowger..... | Knitting.                 |

The Household Science department was without a teacher, owing to the rather sudden death of Miss Cooper, who for many years did efficient work in this department.

The course of study coincides very closely with that laid down by the Department of Education for Public Schools. The organization of the school has been greatly improved since my last visit. The classes line up and move from room to room, in a very systematic and orderly manner. I note also, that more attention is being given to supplementary reading and to current events. I feel that the staff should be congratulated upon the wide range of reading that the pupils have done.

Mr. Cole's class:—

I found these pupils very efficient in arithmetic, and to have a very comprehensive knowledge of geography. Their appreciation of literature was good. They delight in this work. The class has done a good deal of formal grammar and understand sentence construction well.

These pupils have covered a rather extensive course in physics, and have an intelligent comprehension of this subject.

Miss Burns' class:—

The pupils of this class, I found to spell well, and to read with considerable expression. The class had made some progress in French, and were familiar with leading events of British and Canadian History. The subject of history interests these pupils very much, and they have a good knowledge of current events. I was rather disappointed with the progress in algebra and geometry. The class had a very limited knowledge of algebra, and practically no knowledge of geometry.

Mr. Langan's class:—

There are a few pupils in this class, who have recently come to the school, and as a result, are somewhat behind those that have been in attendance all year. I found Mr. Langan interested in his work, and, with the exception noted above, his class to have made very satisfactory progress in arithmetic, reading, literature, spelling, grammar, composition, history and geography. The pupils in this class, as well as those in the others, are being taught to do more thinking and less memory work.

Miss Moffit's class:—

Miss Moffit is doing careful and effective teaching to which the pupils respond eagerly. I found the pupils in this class to have covered the work laid down in the course of study in arithmetic, literature, reading, spelling, writing, history, geography and composition. I was particularly pleased with the progress made in literature and composition.

Miss Maguire's class:—

This is a bright interesting class, and has made definite progress in arithmetic, spelling, reading, writing, composition, geography and history. I am well satisfied with the advancement in this class. It is such as to indicate that the teaching is well done.

Miss Draper's class:—

I found Miss Draper very much interested in her work, and the pupils making definite progress. She succeeds in keeping the pupils interested in their work.

Miss Paterson's class:—

This is the junior class in the school, and the pupils are of various ages, and have entered at different times. These conditions necessitate a lot of individual teaching. Miss Paterson is interested in the work, and securing good results.

#### NOTES.

1. I found Mr. Donkin's boys doing considerable work of a practical nature. The willow work has been largely discontinued, it being replaced by reed and fibre work. During my visit, a very fine display of work, done by the boys, was being offered for sale.

2. I was particularly pleased with the improved physique of the boys, secured by Captain Clegg, in the physical department. If I might offer a sug-

gestion, it would be that the girls receive a physical training, similar to that given to the boys.

3. The organization and discipline of the school continues to improve.

4. Mention should be made of the amount of supplementary reading done by the pupils, and of the interest that the teachers take, in reading to the pupils, and keeping them informed on current events.

5. Pupils are doing more thinking, and less memory work.

E. E. C. KILMER,  
*Literary Examiner.*

Brantford, June 12th, 1926.

### I.—Attendance Since the Opening of the School

|                                                                |   |   |   |           | Male | Female | Total |

## APPENDIX V

## ONTARIO SCHOOL FOR THE DEAF

## ANNUAL REPORT OF THE SUPERINTENDENT

**The Attendance**

The average attendance of the Ontario School for the Deaf for the session of 1925-26 was 288, an increase of two over that of the previous session. The average attendance in the session 1905-6 was 214. This shows an increase in twenty years of seventy-four, or a little more than 33 per cent. If this represented an increase in deafness in the Province, it would be somewhat alarming, but vital statistics do not show any such increment. The increased attendance is largely due to a better realization, on the part of the parents of deaf children, of the necessity and importance of having them educated, and a greater appreciation of the facilities provided by the Department for the liberal education and industrial training of these afflicted children. Added to this is the greater interest being taken in the welfare of defective children by social service organizations, and the assistance given by them in inducing indifferent parents to send their children to school. The officers of the Children's Aid Societies, and the Provincial Nurses, have been of great assistance to us in this respect. All of these considerations and inducements, together with various methods we ourselves employ to discover and get into touch with all those with defective hearing of school age, have resulted in bringing into school practically all the deaf children of the Province who are capable of being educated, thus ensuring that the School shall fulfil to the utmost the purpose for which it was established and is so liberally maintained.

**Health of the Pupils**

As usual the health of the pupils, with the exception of a few who contracted contagious diseases, was exceedingly good. These cases were all of a mild character and the most serious consequences of these outbreaks is the loss of time from the regular classroom work, due to the necessity of strict quarantine. Every effort possible is made to keep the school free from these diseases, but with pupils coming from all parts of the Province and all kinds of homes, with numerous parcels of clothing coming from these homes, and with the many visitors, including parents and other friends of the pupils from all parts of Ontario, it is impossible to prevent occasional outbreaks of contagious disease. The members of the staff are always on the alert for any suspicious symptoms, and this, together with early diagnosis and strict quarantine, usually suffice to limit the outbreak to a small proportion of the pupils. In view of the large number of children in residence, we can thankfully congratulate ourselves on the rarity and quick suppression of all such outbreaks, and on our general immunity from serious cases of illness.

**The Work of the Session**

The training and education of our pupils is, of course, the sole purpose of this school, and the character and quality of the work in the classrooms and shops is the standard by which the record of the session is to be judged. In

this paramount regard the term was a very satisfactory one in practically every respect, though of course there are always degrees of excellence and proficiency. Perhaps the most noteworthy feature was the very gratifying success of two of the pupils in the High School Entrance Examinations. Both boys formerly attended public schools, but had become totally deaf. In most subjects their standing was not higher than the junior third grade when they entered the school in the fall of 1924, and in June, 1926, they passed the test, taking 91 and 84 per cent. respectively, the former being very near the head of the list of candidates in this Inspectorate. So excellent were their papers that the Inspector and Chairman of the Examining Board, H. J. Clarke, B.A., asked to be allowed to retain their papers to show as models of neatness, accuracy and proficiency. Mr. Clarke, who is also our official examiner, expresses his estimate of these boys' work in his report, appended hereto. One of these boys is now attending the Toronto Technical School, where he is making very satisfactory progress. Of course such results as these were not secured except by hard and earnest efforts on the part of their teachers, who remained after regular school hours every day for several months prior to the examination, to give them special instruction. In addition to this, they were given a thorough course in lip-reading by a lady teacher, who devoted to this task an hour after school three days a week for the whole of the previous session. I mention these instances of extra after-hour work, not as being exceptional cases, but as typical of the spirit of the school as a whole. The officers, teachers and other members of the staff, except in rare instances, do not confine themselves to their obligatory duties, but voluntarily spend a great amount of extra time and labour, and even expense, to advance the welfare of our pupils and provide them not only with the best possible education and training, and sympathetic care and attention, but also with all kinds of amusements and good times generally. No child could be better looked after in its own home, and few as well, as every child is here, no pains or trouble being spared to promote their physical, mental and moral well being. Not many parents realize the intense interest and self-sacrificing devotion of the members of the staff, and all parents should greatly appreciate all that is being done for their children here, and should give us every possible co-operation and encouragement in our work. It would perhaps not be too much to say that more is being done for the pupils here and at our sister school in Brantford than for any other classes of children in the Province.

There are some parents, I am glad to say, who do seem to realize this, and have expressed in warmest terms their appreciation of what is being done for their children, and extracts from two or three of the many letters received might not be out of place. One parent writes: "Most people like to hear if their efforts are appreciated, therefore, I wish to thank you for your splendid work for the afflicted ones at your Institution. My daughter speaks most highly of the progress of her son, and of his liking for all around him, which simply means that you, Sir, are to be congratulated and I wish you may long be spared to carry on this splendid work, for it must be most gratifying to you and your associates to see such splendid progress being made." Another parent writes: "On the return of my son to school, I should like to take the opportunity of expressing my appreciation for the excellent progress which was made by him during the year which closed in June last. His progress during that period was most marked. We are often prepared to take good things without comment, and to register protest when matters do not go as we think they should. A little encouragement tends to make the task easier, and I am accordingly writing to express my appreciation. If a similar rate of progress is registered during the

coming year, I shall be more than pleased." Another writes: "I wish to thank you for the good care my daughter received while at school for the past term. She arrived home in first class physical condition, and so well instructed, in fact far in excess of our expectations." During our Christmas festivities, Dr. McMillen, of Sarnia, speaking at the request and on behalf of the more than one hundred parents present from all parts of the Province, expressed himself as follows, as reported in our school paper, "The Canadian": "On behalf of the parents and other visitors present, he would like to extend heartiest greetings to all, and to express to Dr. Coughlin and his staff their appreciation, not only of what they did to give the pupils a happy Christmas, but of the splendid work they were doing for the education and development of the pupils. He had visited the school on several previous occasions and so was able to see for himself the good work done, and the progress that is being made. All the parents of deaf children owe a great deal to Dr. Coughlin for his able and progressive administration and to his very efficient staff for their excellent work. He could assure Dr. Coughlin that they fully approved of the methods employed here, and were well satisfied with the results obtained, and that he had the full confidence of the parents, and, he was glad to say, of the government also, as well as of the public generally, in his administration."

### **Our Teacher Training Course**

Our Teacher Training Course is fulfilling our most sanguine expectations, and the results so far are very evident in the superior work being done in the classrooms, and this year's new training class gives promise of even better results to come. We have been somewhat unfortunate in that three of our teachers, as soon as they had finished the training course, failed to recognize their moral obligation to remain and give their Province the benefit of the training they had received at the public expense and without cost to themselves, even drawing a generous salary during all the time. They "wanted a change" or "wanted to see the world," so secured positions in other schools, where, we might say, the results of our training course are meeting with hearty commendation. The new regulations relative to teachers in training, made out at the suggestion of the Minister of Education, and now in effect, will have a tendency to prevent, or at least greatly discourage, similar unfair and unpatriotic actions in future.

I might remark that our teacher training course extends over a period of three years for teachers who have charge of classes, and the fact that while they are carrying on their lecture, study and observation work, they are teaching a class under daily expert supervision and direction, and thus are able to apply, or have illustrated in actual classroom work, the technical knowledge they are acquiring, very greatly enhances the value of the course. But a teacher who has no class, but devotes all her time to this work, can cover the whole course in one year. Last year we had two such teachers, one from British Columbia and one from Manitoba, taking this one-year course. One of them is on our staff this year and is doing excellent work; the other was unable to accept my offer of a position and in the following letter expresses her appreciation of the course: "At the present time I do not see that I shall be able to apply for a position for next term in the O. S. D. Chiefly for family reasons, I hope to be able to remain in Manitoba. At the same time, I realize that even a year's practical work under the supervision possible in your school would be most helpful and I regret that I cannot avail myself of the opportunity. Looking at your experiment of the one-year training course from my own standpoint,

it would appear to be a success and I am most thankful that I happened to make inquiries regarding such training last autumn. In extent it seemed to equal similar courses offered in the United States and for which the tuition fees were high. The fact that the training was Canadian is, in itself, an advantage, and I am convinced that in no other training school could greater interest have been taken in our welfare than was evinced by yourself, the supervising teachers, and those who conducted observation lessons for the benefit of Miss Armitage and myself. The efforts of all were appreciated, and especially of Miss Ford and Miss Deannard, who unstintingly gave us the benefit of their time and extensive knowledge. I thank you for a most helpful year."

#### **Visit of Prince Edward Teachers' Institute**

On October 15th, by the kind permission of the Minister of Education, and to the great pleasure of our staff, the Prince Edward County teachers, to the number of over ninety, spent one day of their Institute at this School, devoting the whole day to visiting the classrooms and shops and gaining as full an insight as possible into our work. Such visits as these, apart from their propaganda results, are, I think, of real benefit to both the visitors and ourselves, for such contacts and interchange of ideas cannot fail to give an enlarged outlook on the great work in which we are all engaged, and awakening fresh inspiration and renewed enthusiasm in each and every one. This visit was greatly enjoyed by all at the School, and we hope for similar visits from other neighbouring Teachers' Institutes in future. The following letter, which I subsequently received from Mr. F. P. Smith, Public School Inspector for Prince Edward County, gives the impression our School made upon the visitors: "Ever since our Institute visited your school I have been trying to think of words which would express our appreciation of the way we were all used when we were guests of the School for the Deaf. The work which you are doing, in my opinion, cannot be excelled anywhere on this continent. Each child appeared to be happy and content. You are taking children with a handicap which would discourage most of us, and are making of them citizens, not a burden on society, but self-sustaining members of it. We were all particularly impressed by the work of the teachers in the Oral Department. In fact, I would not have believed possible that such results could be obtained. There seemed to be such a close feeling between pupil and teacher that not only were the children given a new outlook upon life, but were sent out with a sympathetic feeling for mankind. Not only were we struck with the intellectual side of the school, but we were equally impressed with the vocational side. We cannot speak too highly of the work of this Department. To all of us it was a revelation of what could be done."

#### **The Expenditure**

The expenditure has not changed materially in the last few years, and the per capita cost of maintenance has become stabilized at about \$400 a year, that for this year being \$391.69.

All departments have been conducted as economically as possible consistent with efficiency, and the farm and garden, while not primarily designed for the production of revenue, has to be credited with fairly good financial returns for the year.

The report of the Literary Examiner, H. J. Clarke, B.A., and that of Dr. Boyce, the Attending Physician, are hereto appended.

Before concluding this report I wish to thank you, Sir, and the Deputy Minister, Dr. Colquhoun, for the constant courtesy and assistance given me in the management of the school throughout the year.

Belleville, November 1st, 1926.

C. B. COUGHLIN,  
*Superintendent.*

#### Officers of the School

| J. N. Boyd          | Baker.                                  |

#### Literary Examiner's Report

My inspection occupied three weeks, one week in December and two weeks in the month of March. I visited each class twice with an interval of approximately three months between the visits, which gave me the opportunity of judging from personal knowledge, the progress in the several classes. In almost every case I found that the progress had been such that the work prescribed for the grade in question would be completed by the close of the session in June. In the case of one or two classes, who were behind in the work covered, it was possible to account for the deficiency by the fact that illness had interfered more or less seriously with the attendance.

With one or two exceptions, that we have already discussed, I found the work well done, and the classes proficient in the work covered. As in former years, I found certain classes to be outstanding in their work. It would probably not be wise to particularize as to the classes referred to in this connection, but I may say that it is a great pleasure to be able to report that the number of these superior classes is increasing, and I am looking forward with confidence to the day when the ordinary class will be the exception. After a thorough inspection, backed up by an experience of nineteen years as your official examiner, it is my opinion that taken as a whole you have a strong and well balanced staff of instructors.

This year two of your senior boys successfully passed the test for Junior High School Entrance. The Board of Entrance Examiners, of which I am Secretary, were highly pleased at the excellence of the papers submitted by

these students. Their work was of a very high order and reflects great credit on the School, and particularly on those directly concerned in their preparation. I most heartily congratulate the boys upon their success, and am personally delighted that these students were able to vindicate your opinion of their capabilities.

If I might be permitted to offer a suggestion, I would say that possibly the work prescribed in a grade where the teacher is undergoing training in methods of instructing the deaf, is somewhat too heavy to be properly covered. What I mean is this. This teacher-training takes considerable time, but is absolutely essential, and while the present curriculum which has been drafted after a great deal of careful thought, on the part of yourself and your more experienced teachers, is quite satisfactory where the teacher is trained and therefore supposedly efficient, it is just a question whether or not there is too much where the teacher is being trained. I consider your outline courses to be excellent and quite reasonable with experienced teachers of the deaf, and perhaps I am speaking without sufficient knowledge on this point.

Another idea that has occurred to me refers particularly to the Senior Department, and perhaps it is not workable at all. It is this: You now use the rotary system to a certain extent in the three higher classes, where the teacher takes the subject or subjects that he is specially qualified to take. Would it be possible to extend this system somewhat to advantage?

In conclusion, I wish to thank you and your staff for the many kindnesses shown me while in the discharge of my official duties. I also wish to say how much I appreciate the absolute frankness of everyone concerned, which made my duties much simpler than they would otherwise have been. There was absolutely no indication that anyone was seeking to hide anything, but on the contrary, I was freely given access to any information that I desired. I appreciate this very much. Wishing you and your staff continued success.

H. J. CLARKE,  
*Public School Inspector,*  
*South Hastings, Belleville and Trenton.*

December 31st, 1926.

---

#### Physician's Report

The session was especially eventful, owing to epidemics of scarlet fever and influenza.

Scarlet fever broke out January 25th, 1926, children who had been in contact were subjected to the Dick test for immunity, active cases were entirely quarantined, and to further advance prophylactic measures, all the children of the school received three inoculations of active scarlet fever antitoxin. The results were highly satisfactory, as we had in all but twenty cases, and none severe—one only being complicated with rheumatism.

An epidemic of influenza, beginning in November, lasted until late in December. It was generally of a mild type, the average duration of the case being from three to five days, four cases only being complicated with pneumonia, but all recovered. Besides the abovementioned, we had four cases of appendicitis, one operated on at Belleville General Hospital, all recovered. Four cases of acute pneumonia—a number of injuries generally minor in character, one fracture.

We had about the average number of ear, throat and nose trouble, and these cases require more or less constant attention to keep them in condition for school.

On the aggregate, I am pleased to report, that, with the above exceptions, the general health of the School has been very good. Now, as at all times, it is the infectious diseases that we fear and endeavour to avoid.

Much credit is due our Nurse, Miss Allison, for the thorough and painstaking character of her work and the interest taken in the general welfare of the children.

W. W. BOYCE,  
*Physician.*

UNIVERSITY OF TORONTO

---

REPORT

OF THE

BOARD OF GOVERNORS

FOR THE YEAR ENDING 30TH JUNE, 1926

---

*To His Honour the Lieutenant-Governor in Council:*

The Governors of the University of Toronto have the honour to submit their twentieth annual report, with which are incorporated the President's report upon the academic work of the University and its Colleges for the Session 1925-26, and the reports of various departments. There are also appended the usual detailed statements of the receipts and expenditures of the Board for the fiscal year, which have been duly audited by Mr. G. T. Clarkson, whose certificate is attached.

During the year rapid progress was made with the construction of the new Hygiene and Public Health Building to which reference was made in the last report, there having been expended thereon to 30th June, \$190,206; and the building is expected to be ready for occupation in the near future.

Under the arrangements made possible by the passing of the Act 16 Geo. V, Cap. 69, whereby an annuity of \$13,480 is guaranteed to the University for twenty years, the present value of which is \$168,000, two properties on St. George Street were purchased for \$60,346. One of these has since been occupied by the Department of Social Service and the other will probably be utilized as a students' residence. Following the close of the year under review two other properties were secured at reasonable prices, one of which has been converted into a residence for men students of University College.

Upon the creation of the Faculty of Dentistry at July 1st, 1925, the Royal College of Dental Surgeons transferred to the University assets to the estimated value of \$475,000 in the form of site, buildings and equipment, subject to a liability of \$50,000 to be paid at a future date. The University accounts consequently now include, for the first time, the maintenance of that Faculty.

The ordinary revenue of the year was \$1,219,722, which includes Dentistry receipts of \$101,695. The deduction of \$26,908 for interest written to Scholarship and other trust funds left a net revenue of \$1,192,814, to which was added the Special Legislative Grant of \$987,945, making a total available income of \$2,180,759.

The expenditure under the appropriations for salaries and maintenance (including Dentistry \$126,014, but exclusive of the Ontario College of Education which is supported by a separate vote) was \$2,128,842. Omitting dentistry

for the purpose of comparison with the preceding year, in which the similar expenditure was \$1,976,415, it will be found that the expenditure of 1925-26 exceeds that of 1924-25 by \$26,413 only, a very moderate increase in view of the magnitude of the services carried on by the Provincial University.

The surplus of receipts over expenditures was \$51,917, which has been carried forward in the Special Contingent Fund to meet the needs of the present or future years.

All of which is respectfully submitted.

H. J. CODY,  
*Chairman.*

Toronto, 29th November, 1926.

# PRESIDENT'S REPORT

1925-1926

*To the Governors of the University of Toronto:*

GENTLEMEN:—

I beg to submit the following report on the academic work of the University and University College during the twelve months ended June 30th, 1926.

The total staff of the University and University College numbered 672, of whom 85 were professors, 63 associate professors, 62 assistant professors, 123 lecturers, associates (in medicine) and instructors in the College of Education, 2 directors, 1 director of field work, 336 demonstrators, fellows and instructors with sessional appointments. They were distributed as follows:

|                                   | Professors. | Associate Professors. | Assistant Professors. | Associates. | Lecturers. | Directors. | Director Field Work. | Other Sessional Appointments |

|                 |    |
|-----------------|----|
| Professors..... | 13 |
| Lecturers.....  | 9  |

With regret I report that the following members of the staff have died during the past academic year.

In October, 1925, Dr. James Mavor, Emeritus Professor of Political Economy, passed away suddenly at his brother's house in Glasgow. Professor Mavor had held this chair in the University for thirty-one years, and was one of its best known figures. He was a man of extraordinary versatility with a very wide range of acquaintance in many lands, and his opinions he held firmly and expressed with decision. His work, both as an economist and as a literary man, was widely known in Britain and on this continent. He will always be remembered with kindness by the older members of this staff.

With startling suddenness, Dr. William Robert Lang was called away in November. Preceding the War he had been for fourteen years Professor of Chemistry in the Faculty of Arts and since the War, Director of Military Studies. He threw himself with enthusiasm into the organization and direction of this new department, and was also Officer Commanding the C.O.T.C. The combined work of these departments he brought in a short time to a high degree of proficiency. He is deeply regretted by his colleagues and students.

In September, 1925, Dr. Patrick Walter Hughes McKeown, Associate Professor of Surgery and Chief Clinician in Surgery in St. Michael's Hospital, passed away after a protracted illness. For years he had served his Hospital and the Faculty of Medicine with devotion and his death has removed one who is affectionately remembered by his colleagues.

Dr. Richard Gand McLaughlin, Professor of Dental Jurisprudence and Ethics in the recently created Faculty of Dentistry, died in December, 1925. He was a man efficient in his profession and in his teaching, intent on good works, and will long be regretted by a large circle of friends.

Miss Louise Isabel Livingstone, after a painful illness which lasted throughout most of the winter, died in May, 1926. For ten years she had been in charge of the Residence for the women of University College known as Queen's Hall, and her memory is cherished with gratitude by those who year after year had been under her kindly supervision.

At the close of the session, Professor W. J. Alexander having reached the age of seventy, retired from active duty in University College in which for thirty-seven years he had held the Chair of English. During these years he taught at some time nearly every student who passed through the College and by universal admission he was one of the most respected teachers of his time.

The following resigned:

Marcel Moraud, L. ès L., Paris, Associate Professor, French; Owen William Ellis, M.Sc., Birmingham, Assistant Professor, Metallurgical Engineering; Miss Lois Katharine Stewart, B.S., Kansas, M.S., Wisconsin, Assistant Professor, Household Science; John Lighton Synge, M.A., Dublin, Assistant Professor, Mathematics; Harvey Clare, M.D., C.M., Associate, Psychiatry; A. Melbourne Patience, B.A.Sc., Lecturer, Electrical Engineering; Stewart Gordon Bennett, B.A.Sc., Secretary, Faculty of Applied Science and Engineering, Lecturer, Commercial Engineering.

Leave of absence was granted to the following:

Charles Ryle Fay, M.A., Cambridge, D.Sc., London, Professor, Economic History, on sick leave for the spring term; George McKinnon Wrong, M.A., LL.D., McGill, Professor, History, for the spring term; Miss Annie Lewisa Laird, M.S., Drex., Associate Professor, Household Science, for the spring term; Ellis Thomson, B.A.Sc., Assistant Professor, Mineralogy; Miss Gladys Ingelson

Wookey, M.A., Lecturer, English, on sick leave; Miss Jessie Gertrude Wright, Ph.D., Lecturer, Botany, to exchange with Miss E. R. L. Reed of the University of Western Australia; Miss Agnes Christine McGregor, Director Field Work, Social Service, on sick leave.

In April, Professor Oskar Klotz, head of the Department of Pathology, was granted leave of absence until the first of November at the request of the International Health Board in order to investigate pathological problems concerning the origin of yellow fever on the West Coast of Africa. The results of this very important commission will probably be of great value in regard to the localization of this dread disease and it is hoped its extirpation.

The following new appointments and promotions were made during the year:

In the Faculty of Arts—Appointments: William John Webber, B.A., Cambridge, Assistant Professor, Mathematics; George William Brown, M.A., Ph.D., Chicago, Lecturer, History; Miss Freda Cooper Cole, M.A., Lecturer, French; Michel Poirier, L. ès L., Lecturer, French; Miss Norma Henrietta Carswell Ford, B.A., Ph.D., Lecturer, Zoology; A. J. Glazebrook, Special Lecturer, Banking and Finance; Andrew Robertson Gordon, M.A., Lecturer, Chemistry; J. F. Macdonald, M.A., Lecturer, English; Thomas Forsyth, McIlwraith, M.A., Cambridge, Lecturer, Anthropology; Robert Edward Kingsdown Pemberton, M.A., Oxon., Lecturer, Classics; E. J. Urwick, Special Lecturer, Political Economy.

Promotions—John Satterly, M.A., Cambridge, D.Sc., London, from an associate-professorship to a professorship in Physics; Emilio Goggio, A.B., M.A., Ph.D., Harvard, from an assistant-professorship to an associate-professorship in Italian and Spanish; William Paul McClure Kennedy, M.A., Dublin, Oxford, Litt.D., Dublin, from an assistant-professorship to an associate-professorship in History; Linnaeus Joslyn Rogers, B.A.Sc., M.A., from an assistant-professorship to an associate-professorship in Chemistry; Fulton Henry Anderson, B.A., Dalhousie, M.A., Ph.D., from a lectureship to an assistant-professorship in Philosophy; Edward Horne Craigie, B.A., Ph.D., from a lectureship to an assistant-professorship in Comparative Anatomy and Neurology; Geoffrey Elwood Holt, M.A., Mus. Bac., from a lectureship to an assistant-professorship in German; Norris Edward Sheppard, M.A., from a lectureship to an assistant-professorship in Mechanics.

In the Faculty of Medicine—Appointments: Henry Arthur Cates, M.B., Assistant Professor, Anatomy; Peter Joseph Moloney, M.A., Ph.D., Assistant Professor, Hygiene; J. E. Bates, B.A., McMaster, M.B., Lecturer, Pathology; George Herbert William Lucas, Ph.D., Lecturer, Pathology; John Gerald Fitzgerald, M.D., Director, School of Hygiene; Robert Davies Defries, M.D., D.P.H., Associate Director, School of Hygiene.

Promotions—Hardolph Wasteneys, Ph.D., Colorado, from an associate-professorship to a professorship in Biochemistry; Nicholas D'Arcy Frawley, M.B., from an associateship to an assistant-professorship in Obstetrics and Gynaecology; George Hunter, M.A., B.Sc., Glasgow, from a lectureship to an assistant-professorship in Pathological Chemistry.

In the Faculty of Applied Science—Appointments: James Arthur Newcombe, B.Sc., London, Assistant Professor, Metallurgical Engineering; William Bowie Dunbar, B.A.Sc., Lecturer, Engineering Drawing; William Gourlay McIntosh, B.A.Sc., Lecturer, Mechanical Engineering; Robert J. Montgomery, Cer. E., Ohio, Lecturer, Ceramics; A. Melbourne Patience, B.A.Sc., Lecturer, Electrical Engineering.

In the Faculty of Household Science—Appointments: Miss Charlotte Frances Valentine, M.A., Lecturer, Household Science.

In the Faculty of Music—Appointments: Ernest Campbell MacMillan, B.A., Mus. Doc., Oxford, Lecturer, Church Music.

In the Faculty of Dentistry—Appointments: Entire Faculty.

In the Department of Military Studies—Appointments: Brigadier-General George Strachan Cartwright, Director of Military Studies.

The total number of students registered in the University in 1925-1926 was 5,480, distributed as follows:

|                                                 | Men   | Women | Total |
|-------------------------------------------------|-------|-------|-------|

Exclusive of the Faculty of Dentistry this total is larger than that of the preceding year by three hundred students, the increase being chiefly in the Faculty of Arts and the Ontario College of Education.

In addition to the students in regular courses at least 2,225 persons have been receiving instruction provided by the University through its evening classes held in Toronto, Hamilton, and other cities and towns of the Province.

During the past session the School of the Royal College of Dental Surgeons became the Faculty of Dentistry in the University, thereby adding 346 students to the roll of the University, and bringing new demands and new opportunity for meeting the needs of the people of the Province. It is hoped that the University will be able, as it has done in so many other instances, so to develop teaching and research in this Faculty that the profession of dentistry in Canada will more than maintain the high position that it now occupies.

The Reception Hospital for the observation of mental diseases, erected at the expense of the city and maintained by the Government of the Province, was opened for teaching purposes at the beginning of the session. The Director of the Hospital, Dr. C. B. Farrar, was also appointed Professor of Psychiatry in the University. It is hoped that under him the opportunities now made available will prove to be of high advantage to the students of the University and in the understanding and restraint of mental diseases.

The University was fortunate in being able to supply the place of the late lamented Colonel Lang by Brigadier-General G. S. Cartwright, who already for some years had been a voluntary instructor in the department, and was able to carry on the work with the least possible interruption.

We are also indebted to Mr. E. J. Urwick, formerly Professor in King's College, London, for having so willingly undertaken lectures in Economic History for which, owing to the illness of Professor Fay, it was necessary to provide during the second term.

The University continues to be under an indebtedness to gentlemen in various branches of business who have delivered lectures to the students in commerce on phases of business with which they have been specially familiar. Especial mention should be made of the services rendered by Messrs. Macaulay, Hume Cronyn, Herdegan, Marvin, Ratcliffe, Pritchard, J. A. Tory and S. R. Parsons.

The figures in this report with regard to the attendance give all the information that is necessary, but I may merely draw attention to the fact that the attendance in the Ontario College of Education has been unusually large and that the supply of high school teachers in Ontario, like that of the public school teachers, now exceeds the demand. In the new course provided in the Faculty of Household Science there has been a larger attendance than was anticipated. It is also noteworthy that more students from other countries than Canada are coming to the University each year, and especially is this manifested in the Department of Nursing in which last session several students from Europe, chiefly supported by the Rockefeller Foundation, received their training. I would call attention to the new arrangement of the course in Nursing which is outlined in the Report of the Director.

On January 19th the new Forestry Buildings were opened, and a hope long cherished has been fully realized. Also on January 20th the foundation stone of the School of Hygiene was laid. The erection of this building has been made possible through the gift of the Rockefeller Foundation, and when completed it will be one of the most adequate for its purpose to be found in any university. To make way for the erection of this building the Department of Social Service

was transferred to a residence on St. George Street, which without very large expense accommodates the department even better than did its former home.

The presentation of a portrait of the Honourable Robert Baldwin was the occasion of a very interesting gathering in Baldwin House on December 16th. The portrait, made from the most authentic likenesses, is the gift of his descendants, and is a valuable acquisition to the University which owes so much to this statesman.

Most significant also of the great change that has come about in the higher education of this Province is the fact that in October, 1925, there was the formal opening of the beautiful new building of Trinity University and College on the grounds of the University, and that the Senate of the University held a special Convocation at which honorary degrees were conferred in recognition of this event. The success of university federation in Toronto is an accomplishment of which all those who had a share in bringing it about may be justly proud.

One of the many distinguished visitors at the University during the past session, after studying carefully the faculties at work, expressed in public his admiration for the spirit of the University particularly as shown in the unity that pervades its multiplicity. He found here a federation in which various units were reconciled while retaining their individuality and receiving support from the Province; also a great variety of faculties and departments brought together in close relationship so that throughout them all there is a strong feeling of being organically connected with a larger whole. Among the students he found this manifested in Hart House, where the men of the various faculties come together in one building affording them almost every variety of social, athletic and spiritual opportunity. Indeed the unique value to the University of Hart House is now widely recognized not only on this continent but in Britain as well. If the observation as to our unity in multiplicity be correct, as I believe it to be, the future of the University is well assured, for one of its main purposes is to afford the support and stimulus that come to all professors and students from the realization that they are members of one body, and that by each member performing its function the health and work of the body will be developed.

Other visitors have been impressed also with the goodwill that exists between the University and the city. My observation would lead me to believe that this has been increasing and that the city is well disposed towards the University whose name it bears.

I wish in this report to draw special attention to the great growth in the spirit of research that has been manifested in the past five or six years. The University is alive with a new life and from every part of it there comes the desire to have a share in the advancement of knowledge, and in the deeper understanding of the forces both in the human and natural world, which must always be under investigation by any great university. A survey of the work of the period will be found in the appendix.

Hart House has been such a factor in the life of the men students in this University that the lack of any building in which the common life of the women of the university may be promoted is all the more felt. The facilities for physical training are quite inadequate, and there are no rooms in which the women of all colleges and faculties can meet together for general university purposes. During the past year plans for a new building have been drawn up, and again I wish to express the strong hope that it will not be long before these plans are carried into effect.

In an annual survey it is only right that mention should be made of the special needs of the University. Of all the departments, Botany is that which

has been waiting longest for better equipment. For many years the great need of a Botanic Garden for this University and Province has been emphasized. In the neighbourhood of Toronto a suitable site may be obtained in which the national botanical treasures might be displayed and their economic possibilities set forth. Recently the Director of the Royal Botanic Gardens at Kew has visited the city, and once again it has been brought to our attention that such a garden is a necessity for the study of native vegetation, the preservation of native flora, and the promotion in the Dominion of economic developments similar to what has been so effectively done for years by Kew Gardens.

Another need that for years has remained unmet is the provision of an observatory with a modern telescope worthy of this Province and of the University. It is probable that the city could be induced to co-operate with the University in both these enterprises, and in both there is a field for private benefaction.

It will be necessary soon to enlarge the library. It is now nearly twenty years since the last addition was made, and the space on the shelves is almost filled. The use of the library, as I have mentioned in my former reports, has been greatly increased of late years, and the growth of graduate work makes far greater demands upon it. It has a larger collection of scientific and foreign periodicals than any other in Canada, and though it offers average opportunities for work, the money spent upon it has not enabled the librarian to overtake the demands made upon him for books for the different departments. Both accommodation and contents must be added to.

During the session the following special lectures were delivered:

A course of twelve lectures on "Some Manners and Customs of Peoples of the World," by Sir Bertram Windle, F.R.S., Special Lecturer in Ethnology in the University of Toronto; two lectures on "Roman Aqueducts" and "Roman Roads," by Dr. Thomas Ashby, Director of the British School of Archaeology at Rome; two lectures by Dr. Gilbert Bagnani of Rome on "Life in Ancient Rome Under the Empire," and "Pagans and Christians in the Light of Recent Discoveries"; three lectures on "Matthew Arnold," by Professor G. G. Sedgewick of the English Department of the University of British Columbia; five lectures with readings from his own poems by Bliss Carman, the Canadian poet; a lecture on "The League of Nations and the Schools," by Dr. Maxwell Garnett, Secretary of the League of Nations Union of Great Britain; three lectures on "Plant Population and Juxtaposition as Leading to Conjoint Life," "Size as a Factor in Stellar Morphology," and "Natural Classification of Ferns," by Professor F. O. Bower of the University of Glasgow.

The triennial delivery of the Marfleet lectures took place last November, when a series of three lectures was delivered by the Honourable John Bassett Moore of the Permanent Court of International Justice at the Hague. Judge Moore, who is one of the leading authorities in the United States on International Law, took as his subject "Judicial Power: Its Possibilities and Limitations." These lectures will shortly be published.

Dr. F. A. Mouré, University organist, again gave a series of organ recitals in Convocation Hall to large audiences.

Three special convocations were held in September, for the purpose of conferring honorary degrees upon the Right Honourable Baron Buckmaster; in October, in connection with the formal opening of the new Trinity College Building, when honorary degrees were conferred upon the Lord Bishop of Toronto, Miss Mabel Cartwright and C. S. MacInnes, Esq.; in March, when the honorary degree of Doctor of Laws was conferred upon Field Marshal Viscount Allenby.

During the past year the University has received the following benefactions:

From the Rockefeller Foundation, payment on account of grant for construction of new Hygiene Building, \$300,000; second payment on account of School of Hygiene, \$12,500; Eaton Endowment (annual payment), \$25,000; Laura Spelman Rockefeller Memorial for Child Research, \$12,000; John Honor bequest, \$7,106; Margaret W. Baptie bequest, \$4,000; Dr. D. C. Balfour, Lectureship in Surgery, \$4,000; Graduate Fellowships: Colonel R. W. Leonard, \$500; Imperial Oil Company, \$500; Sir Edward Kemp, \$500; The Robert Simpson Company (for 1926-1927), \$500; Canadian Pacific Railway (for 1926-1927), \$1,500; Canadian National Clay Products Association for Ceramics, \$3,000; Ontario Women's Liberal Association, for Sir Wilfrid Laurier Memorial Scholarship, \$2,100; E. R. Peacock, Esq., and Sir Joseph Flavelle, for Flavelle-Peacock Lectureship, \$1,250 each; Federation of Jewish Philanthropies, for Rabbi Brickner Scholarship in Social Service, \$1,050; David Fasken Trust, \$1,000; Mrs. F. F. Dalley, Sr., for Physiology Research, \$600; Robert Bruce Scholarship, \$460; Sir Henry Thornton, for Sesquicentennial Exposition, \$360; Boiler Inspection and Insurance Company, Scholarship in Mechanical Engineering, \$150; T. Eaton Company, Limited, for Sir John C. Eaton Memorial Scholarship, University Schools, \$120; the late Mrs. Herbert Barton, for Jardine Memorial Prize, \$100; McCaul Scholarship in Classics: G. A. H. Fraser, Esq., \$25; Principal M. Hutton, \$25; A. M. Stewart, Esq., K.C., \$25; Toronto Bankers' Educational Association, Prize in Physics, \$50; Dr. R. A. Reeve Prize, \$50; University College Alumnae, for Prize in English, \$10.

All of which is respectfully submitted.

ROBT. A. FALCONER,  
*President.*

October 28th, 1926.

## A SURVEY OF RESEARCH IN THE UNIVERSITY OF TORONTO

1920 - 1926

---

A survey of the past six years of the life of the University indicates that the greatest development has lain in the movement for research, especially in the scientific departments, and that in this the University is fulfilling one of its most important functions. The new movement may be said to have begun with the creation in 1912, through gifts from citizens, of a Medical Research Fund amounting to nearly \$50,000 and the erection of the Connaught Anti-toxin Laboratories through the generosity of Colonel A. E. Gooderham. In 1915-17, a special fund of \$15,000 was established by the Government for the investigation of problems connected with the functional re-education of returned soldiers; also of problems in Engineering and Applied Chemistry, prior to which time teaching had constituted almost the entire work of this faculty. The greatest forward step was taken in 1920 when \$60,000 was placed in the annual estimates by the Government for scientific research. This has been continued and augmented until now it amounts to \$80,000. In addition the Government has set aside annually \$10,000 for the maintenance of research by Drs. Banting and Best. Also in the summer of 1925, the Banting Research Foundation, amounting to nearly \$600,000, was created, chiefly through the efforts of the Chancellor, Sir William Mulock, and some Toronto gentlemen, the proceeds to be devoted to medical research in this and other Universities of Canada. Grants have also been made by the Carnegie Corporation in aid of investigations in the Departments of Physics and Physiology. In view of the expenditure of such large amounts of money the question is often asked as to results, and naturally so, though it cannot be too strongly emphasized that perhaps the most important is the creation of a new spirit which is only to be felt. One professor writes that "since the inception of the research fund the spirit and attitude of the departmental staff have been revolutionized." This I believe would be agreed to by the heads of most of the departments. Further, the discovery of a piece of scientific information, which may as often as not have been an unexpected side-issue, may not at present seem to be of special value, but may at any time lead to greater discovery. It is, however, possible to point to tangible results, valuable professionally and in their application to industry.

The first great contribution to the life of Canada made possible by this fund has been the large number of young men and women who have been trained in research methods and have been prepared for a life of scientific research. The Secretary of the School of Engineering Research writes that in engineering ninety-nine graduates have been in the employ of the School as Research Assistants and these positions are now being looked upon as a reward for exceptional laboratory ability and high scholarship. Another writes that in every year of the six at least twenty-four young men received training in methods of chemical research and this is the most important result of the policy of the University; and a third writes, "to my mind the real value of the research fund is to train young men for service in Canada." In addition to the trained body of research workers upon whom the Dominion and the Province may draw for

the development of their resources and the advancement of science within our borders, there have been advances made in pure science of the highest importance. It is difficult to know when a discovery in pure science passes over the border into applied science, so obvious is it that a practical application often is the outcome of a purely scientific method and spirit. Who can estimate what Drs. Banting and Best have done for the world? And yet they were moved by a pure scientific spirit of discovery. If there had not been a physiological laboratory presided over by such a leader of scientific method as Dr. Macleod, in which they had the co-operation of other men of scientific mind and training the present results would not have been what they are. Though it is, therefore, almost impossible to distinguish the line where the purely scientific departments pass over into the applied, I shall first refer to the former as ordinarily defined.

In Botany studies have been made of parasitic fungi and rusts of conifers with a view to the eradication of their "intermediate hosts"; of the diseases of spruces, balsams, larch and jack-pine to which are due high losses in logging. Studies have been made of defective pulpwood and of the red stain of jack-pine which affects greatly the value of railroad ties. These studies will prove to be of use to the Ontario Forestry Branch and to those engaged in the lumber industry. For several years also work has been done on poisonous plants which has already been recognized as of great practical value to medical men, veterinarians and stockmen.

In Zoology there have been developed co-operative investigations in relation to agriculture, animal breeding and fisheries, and "the amount of work accomplished during the last five years is easily the equivalent of that accomplished during the whole previous history of the department"; "it is certain that any one of the enterprises as, for example, the work of the Fisheries Research Laboratory, would justify the entire expenditure made for research purposes." The proper administration of fisheries, now worth in this Province alone annually \$3,000,000, depends upon intimate knowledge of the biological conditions of the water, demands thorough-going examination by experts as to food enemies, growth, time of sex maturity, and other factors. Most valuable work has been done in Lake Nipigon which has received recognition abroad. But it is only in its beginning and much larger funds should be made available.

In Zymology, which is the science of fermentation, for some years there has been a close study of a fundamental problem as to the oxidization of glucose and other sugars, which has an important bearing on several phases of scientific and industrial activity, since acetone, butyl and ethyl alcohol and lactic acids are its products. In fact so important is it that Dr. Speakman of this department was at special request granted leave of absence to diagnose and correct processes in an important industrial plant, and investigations are being conducted which may have great value for this branch of Canadian industry; other results may be of value to the fish industry.

In Chemistry there have been investigations as to a method of preparing certain types of organic compounds, of use not only in scientific laboratories but in chemical manufactures. Two distinct chemicals have been found present in beer-wort and in a hundred fruit juices, leaf and root extracts, animals, etc., which must be added to the artificial media if results are to be obtained comparable to those of nature. These are not identical with any known vitamins, but both are absolutely indispensable to the reproduction of certain races of yeast, and it is being attempted to isolate these physiologically important substances and study their chemical constitution, in the hope of opening up a new group of organic compounds of great theoretical and practical importance.

Other investigations have dealt with conditions that are the source of much trouble in the equipment of the electrical furnace, and others have been conducted in order to secure reliable data on concentration changes during voltage measurements. Others again as to causes of the blue colour of the skies and the blue path of an intense light beam through a liquid or gas, and it has been found that this light scattering is a definite measurable property of all pure substances.

Coming to Biochemistry it is difficult for any but an expert to have much conception of the problems, but Professor Hunter has been investigating the proteins and the ferments or enzymes, which as constituents of protoplasm are responsible above all others for and necessary to the existence of life. He has thrown light upon the general chemical constitution of proteins, and in the investigation of enzymes he has arrived at results which may prove of fundamental importance showing how digestive enzymes may synthesize proteins from the products of digestion; similarly glycogen can be synthesized. His method has been of value in studying the course of gastric digestion and his results have been recognized by experts as "valuable contributions."

The grants for Geological Research have been spent on most successful expeditions to Alberta in the search for fossil dinosaurs, and five new genera and two new species have been discovered and described. These have attracted wide attention, and their actual cash value many times exceeds what was spent on them. The geology and palaeontology of the Credit River area and of a section of Georgian Bay has also been carefully investigated. Professor Coleman has continued to conduct investigations of glacial geology in the Rockies, Gaspé, Labrador and Newfoundland, and Professor Moore of the economic geology of Northern Ontario.

In Mineralogy continued investigation has shown that in Ontario there are rock formations containing pitch-blende among the oldest known on the earth's surface. One new mineral has been discovered which seems to constitute the most hopeful source of radium in Canada, and attention has been called to occurrence of two other Ontario minerals, not previously known to science. There are other results also which may be later applied in the study of deposits of economic minerals.

As far back as the War the Psychological Department devoted much attention to problems of the physical and mental re-education of convalescent soldiers, and later enquiries have grown out of that. Study of muscle action led to knowledge of stereoscopic vision and characteristic eye movements in reading. Modifications in methods of teaching reading have been suggested and the results have become part of the standard tests for aviation pilots. Further study has been made of motor functions, educational maladjustment and behaviour problems.

An investigation into the fur trade led to the publication by the Department of Political Economy of a variety of theses dealing with many aspects of the trade, and these have elicited widespread and most favourable appreciation expressed in letters and otherwise from those concerned in this department of trade and industry.

The special research carried on in the Department of Physics during the past five or six years that has commanded the attention and won the approval of the scientific world has been chiefly in the domain of low temperature, spectroscopy, magnetism and colloidal solutions.

In the field of Low Temperature Research the first accomplishment was the liquefaction of helium. As this had only been done in one other laboratory in

the world, namely, in Holland, it at once placed our laboratory in a unique position among the laboratories of the British Empire and of America.

The second accomplishment in this field had to do with the spectrum obtainable from nitrogen solidified by liquid hydrogen or liquid helium, and Vegard's theory has been overthrown by the demonstration that none of the features of the spectrum of solid nitrogen are found to characterize the spectrum of the aurora. This result has also led on to other researches that have had a successful issue in the field of spectroscopy.

In connection with investigations on the structure of atoms it has become of importance to ascertain if possible the exact form and structure of the molecules of hydrogen and helium, two of the simplest of the elements. By investigating the spectrum of these gases at the low temperature obtainable with liquid hydrogen and liquid helium their spectra have been so simplified that the road is almost directly open to the general solution of the problem of the structure of these molecules.

By low temperatures, gases such as oxygen, nitrogen, chlorine and bromine have been solidified, and as a consequence the crystal form of these simple elements when solidified has been determined, a result that is helping to a clearer conception of the molecular form of these and other substances.

A year ago a most notable discovery was made in the field of spectroscopy, namely, that of the origin of the famous green line in the spectrum of the aurora. It has been shown to have its origin in oxygen and not in nitrogen as was thought by Vegard. Physicists have been endeavouring for sixty years to obtain in laboratory experiments the green spectral line that is the chief characteristic of the auroral spectrum. This line has been obtained with oxygen under certain conditions, and especially strong when oxygen mixed with one or other of the rare gases, helium, neon, or argon, was used.

This research has stimulated much research work in the world because of the fact that it has opened the way to our learning something of the constitution and state of the upper atmosphere in regions as high as 400 miles.

In the study of colloidal solutions such advances have been made that Professor Burton is looked upon as a leading authority on this subject.

In order that the Department of Astronomy might share in the expeditions that were made to Australia and Mexico grants of money were assigned to Professor Chant. By the former expedition, which was made for the purpose of observing the transit of Venus, most valuable data were obtained in confirmation of the recent Einstein theory.

In Physiology researches have been conducted on carbohydrate physiology, including and leading up to and following the discovery of insulin, which discovery alone has more than justified all the expenditure. There have been other researches such as those of Dr. Fidler dealing with the respiratory exchange of simple forms of animal life; others again on the control of respiration, the function of the nervous system, and ductless glands.

In Anatomy the development of the roof of the fourth ventricle of the brain has been investigated, and while the study is not yet quite complete, it points to the necessity of a decided modification of current views as to the structure of this part of the brain. The matter is of considerable practical importance.

Other investigations have been made as to the deposition of calcium salts in animal tissues with a view to discover the conditions governing the formation of bone and of the calcification which may occur in various tissues, such as cartilage, the walls of the arteries, etc.; others again as to pathological conditions of the central nervous system.

There can be placed to the account of the School of Engineering Research improvements in processes, in design and in engineering practice as well as investigations into underlying facts and principles. These have been embodied in six bulletins which contain seventy-seven research papers for which there has been a wide demand from engineers and scientific workers in many countries. They cover a large range of subjects: on methods of computing the flexural strength of reinforced concrete fixtures in electrical distributing systems; wind-stressing in reinforced concrete chimneys; economic proportions of conduits; effect of movement of crowds on structural members of large buildings; metallurgical difficulties in cyaniding gold ores with small amounts of copper; electrolytic methods of refining nickel; chemical problems in engineering concerning materials for furnaces; the causes of change of colour in pigments; wood distillation and the constitution of cellulose, which as pulp and paper is produced in Ontario in enormous quantities. It is hoped that as a result much waste in manufacture may be eliminated. Investigations into the constitution of rubber and the nature of the change occurring in its vulcanization have received attention in the rubber journals of England and France. A new theory of the mechanism of catalysis has been propounded which may lead to practical results in industrial processes.

Professor Haultain's work on the problem of the paths of balls in rock crushing mills has shed so much light on the subject that the exhibition of his films has been asked for in all the important mining centres of the United States, and the explanation has now been accepted.

In the Hydraulics and Thermodynamics Laboratory, Professor Augus has been studying the effect of water on the dam, from which he has deduced results as to the shape of canals which were embodied in the design of the Chippewa Canal and the intake at Niagara Falls. Other researches have dealt with the best methods of constructing buildings to save coal.

The investigations conducted by Professor Parkin in the new wind-tunnel have received strong commendation and have led to the development in Canada of a series of types of aircraft adapted to Canadian conditions and requirements. He has demonstrated that a properly designed tail leads to stability and control, and these improvements will be made use of in design of machines for exploration, forest patrol and general commercial service.

In electrical engineering, Professors Rosebrugh and Price have carried out both theoretical and practical researches dealing with the calculations as to transmission lines and groups of lines; the theoretical results by the former were presented to the Mathematical Congress that met at Toronto two years ago. On the practical side the work has chiefly been on electrical current transformers and a new method of constructing a seconds pendulum for electric clocks.

Work has been done under Professor Anderson on illumination and especially as to the action of automobile headlights.

By the Department of Architecture a record has been made of fine old houses of Ontario which were erected in the eighteenth and nineteenth century, many of which are now in a bad shape of repair but are of great architectural merit, and the design of which will be of value in the history of Canadian architecture.

Experiments have been conducted under the direction of the Committee on Experimental Research in the Faculty of Medicine covering almost every department of medical activity. In all over forty persons have been engaged in research during these years, and there is a record of over sixty researches, some of them of great importance for practical problems in medicine and surgery.

In 1917 the Connaught Laboratories and University Farm were acquired by the University through the generosity of Colonel A. E. Gooderham. The laboratories were provided primarily for the purpose of supporting research into problems of Hygiene, Preventive Medicine and Public Health, especially to provide means whereby "the incidence of and mortality from communicable diseases may be lessened."

In that year (1917) an undertaking was given by the Prime Minister of Ontario that a sum of \$3,750 would be voted annually by the Legislature of the Province of Ontario for the support of this research work. In 1919, this undertaking was implemented and the Research Division of the Connaught Laboratories was established. Financial support for the work of this Division has been provided by the income on the Connaught Laboratories Research Fund, the annual grant referred to above, substantial contributions annually from the income of the operating divisions of the Connaught Laboratories, and finally by a grant from the Government of Canada provided through the Department of Soldiers' Civil Re-establishment. This latter grant is made to meet the cost of laboratory work undertaken for Chest Clinic at the Christie Street Hospital, Toronto.

In a general way research undertakings of two sorts have been undertaken. First, those which have been carried on in the Connaught Laboratories and Department of Hygiene and Preventive Medicine by members of the staff of those laboratories, and secondly, co-operative investigations where the personnel of these laboratories have joined with their colleagues in other departments in programmes of research. These conjoint efforts have been liberally supported by Connaught Laboratories funds. In addition, a demonstration was financed by the Connaught Laboratories to assist in the organization and development of the Students' Health Service of the University.

Since 1920 investigations have been undertaken in the Research Division of the Connaught Laboratories and in the Chest Clinic, Christie Street Hospital; a demonstration which led to the organization of the University Health Service; co-operation with the Department of Physiology in providing for research work in applied physiology (certain problems in ventilation) and in early insulin investigations; with the Departments of Physiology and Zymology in conducting an investigation into the question of the possible therapeutic value of tissue extracts (chiefly liver extracts) in the treatment of essential hypertension; recently in association with the Department of Pathology and Bacteriology in conducting research into certain aspects of the problem of human and bovine tuberculosis in conjunction with the National Research Council of Canada.

Within the Research Division of the Connaught Laboratories, a large number of investigations in the fields of bacteriology, immunology, immunochemistry, infection and immunity, applied physiology, and biochemistry have been carried on. The subjects of tuberculosis, diphtheria, scarlet fever, vaccinia, among a great many, have received especial consideration. During the past six years two volumes of studies comprising fifty-nine papers have been published.

## REPORT OF THE PRINCIPAL OF UNIVERSITY COLLEGE

PROFESSOR MAURICE HUTTON

The session of 1925-1926 has been passed under the disadvantage involved in the resignation of Professor John Macnaughton—a tower of strength in himself to University College, with his unequalled combination of scholarship, eloquence, breadth of view and popularity—and in our inability to find a successor adequate to fill his chair.

The disadvantage passes away with the session; and in Professor Gilbert Norwood, formerly Fellow of St. John's College, Cambridge, and Professor of Classics in University College, South Wales, and well-known classical author, we have reason to hope that even John Macnaughton's absence will not be irremediable—*il n'y a pas d' homme necessaire*—not even John Macnaughton.

Meanwhile the College Department of Latin has functioned fairly well with the assistance of the staff in Greek and with the addition of Mr. Pemberton, a first-rate Oxford man, whose sources have been placed at our disposal by the kindness of the Provost of Trinity College.

Professor J. H. Cameron, Head of the French Department, will be away on leave of absence after the end of this session; no department is more congested, and the withdrawal of Professor Cameron will involve new appointments, one or, better, two in French.

In spite of the withdrawal from University College of the Administration, the pressure on its lecture rooms continues very severe and embarrassing; large classes in Mathematics and Political Science—not college subjects—have still to be provided for by University College.

The suggestion from the Premier and Minister of Education that the first year should be handed back to the schools of the Province and that the University course should be thereby shortened by one year at least, has not—in the form which it has hitherto taken—recommended itself to this any more than to the other colleges: but University College is heartily in agreement with the Minister that the courses in the secondary schools of the Province should be lengthened by two or three years; not, however, at the end of the school course when the pupils would be in all cases too senior to profit by school-room methods and in many cases too advanced to find adequate teaching, but at the beginning. It has long been the glaring blot upon our secondary schools that they get their entrance pupils two or three or even four years too late. What can the average boy or girl be expected to make of foreign languages, ancient or modern, if they cannot begin them at the natural age for beginning foreign languages (as well as native languages) childhood, from the age of eight or nine years to twelve? At present the majority are nearer fourteen, and never recover the handicap of a start so conspicuously belated; no civilized country except Canada expects to make language scholars out of children who are caught so late; possibly Ontario has not expected it either, at any rate it has witnessed, hitherto without protest or counter-effort, the disappearance of Greek even from some institutes (including the vast majority of those in Toronto itself), and the steady lessening of the supply of good students in Latin in proportion to the need of them: the number of specialists in Classics is at the present moment quite inadequate to

the number of secondary schools which should be manned by them; as a result, Latin is actually taught in some of these schools to-day to candidates for honour matriculation, by teachers who have never taken more than a pass course in Latin themselves, the condition would be ludicrous if it were not lamentable.

Any shifting of first year work (especially first year honour work) back to the schools would reduce the honour graduation standards of this college *pari passu*; any such reduction would remove at once the one conspicuous advantage which the University of Toronto possesses over every other university of this continent, the proficiency reached by its honour students at the date of graduation, and the advantage they possess over other graduates in the graduate universities of this continent, in the competition for scholarships, fellowships and, eventually, professorships.

It is not by accident that Toronto graduates fill so many chairs in the new universities of Canada and the United States; it is the direct result of the high standard of our honour students at graduation; that standard has been in its turn the direct result of four years in honours in University College and the sister colleges of this University. For example, in classics we have seen, during this session, three honour graduates of this college teaching classics in a sister university in virtue and in virtue alone of our four-year honour course, against which other universities of Canada could not compete.

The points I have been trying to make are in no case my own only or even my college's alone, they rather show that University College in this matter of the first year in the secondary schools is in entire agreement with the staff of Victoria College and of Trinity.

## SUMMARY

## AUDITOR'S REPORT

*To the Governors of the University of Toronto:*

GENTLEMEN:—

I have verified the attached Balance Sheet of the University, dated 30th June, 1926, and Schedules 1 to 10, and report that all the transactions of the year upon Revenue and Capital Accounts have been duly audited and found correct.

Yours faithfully,

J. MARSHALL,

Toronto, 27th October, 1926.

*Auditor.*

## FINANCIAL STATEMENT
